

SELF-EXCITED OSCILLATION HEAT PIPE
AND COMPUTER PROVIDED WITH THE SAME

ABSTRACT

The present invention ~~is to provide~~ provides a heat pipe which is high in heat transfer performance and reliability and can be ~~low priced~~ low-priced, compact and lightweight, and has a flexibility, and a computer provided with the heat pipe. At least a part of a conduit (1) constituting a container of a self-excited oscillation heat pipe is formed in a shape having a flexibility such as a waved bent shape. Alternatively, at least a part of the container of the self-excited oscillation heat pipe is formed of a material having a flexibility such as super elastic alloys.
